"Independent."

DANIEL LOGAN, Editor.

MONDAY, - - AUG. 26, 1895.

OFFICIAL NUISANCE.

Since the time at which our representative took a view of the dump in South street, a great deal of garbage from all over the city has been deposited there. Not only that, but the dead horse previously mentioned has been buried on the ground. Hitherto the Board of Health has refused permission for the burial of dead horses in that dumping ground. Residents of the vicinity are indignant at the outrage, and have continued against their sanitary well-being by the Board of Health. Yesterday there was a southwest breeze prevailing, and they were treated to sickening effluvia from the dump. They are determined, if the Board does not decide today to cease dumping garbage there, as well as to cover up with earth or sand the present deposits, that they will assemble in indignation meeting. If they are compelled to do so, the whole civilized part of the town should give countenance to the object of their assembly. No terms are too strong for condemnation of the conduct of the Board, in depositing the filth scourgings of the rest of the city in a quarter of it which is not even a detached one, as its buildings adjoin the long-built portions of streets running lengthwise and crosswise of the city plot. This is no new matter of complaint, either, for more than ten years ago a lady owning a cottage on South street, before the large plain on the upper side was built upon, protested against a stable manure depositary started where the Board of Health now maintains its garbage dump. If the Board does not immediately abolish this its own menace to the public health, cholera or no cholera, that body will deserve a title far different from that of "the pride of the city" lately bestowed upon it.

OBSERVATIONS.

The argus-eyed tax office people allowed a Chinaman to skip the country by a late steamer who owed something like \$800 to the treasury. He owed other debts in town, but the Government is not responsible for these.

If the Board of Health had hastened to cleanse the town whenever news of cholera in Japan was heard here, it would only have been doing what is usually done in sensible communities when they hear of infectious disease in foreign ports with which they have commerce. We have monthly steamers from China and Japan, yet when cholera is known to be in those countries our Board of Health relies for immunity on a steamer's bill of health.

Strong swimmers have often lost their lives in venturing amidst breakers. The scientific theory is that they inhale the watery froth, which entering the wind-pipe strangles them. Some narrow escapes have lately occurred in the Waikiki surf, and in consequence the strongest swimmers ought to be careful. For the same reason a swimmer on emerging from a long dive, after suspension of breathing to the greatest limit, ought not to be "ducked" by

sportive companions until he has had time to take fresh breath.

As it is fashionable to offer conjectures on the non-arrival of the Warrimoo, we advance the theory that the Monowai met and spoke with her, and that in consequence the Warrimoo is now steaming for Fiji.

So far as can be learned, none of the alleged cases of Asiatic cholera have been certainly traced to infection coming off the steamer Belgic. There are many different species of cholera, the mildest of which must not be trifled with. An unsanitary town in a heated term is almost sure to have a good deal of disease of the choleraic class. There is a possibility, if not a probability, that, so far as what has already happened is concerned, the Board of Health would have more deaths to report this month if no steamer had arrived from Japan in six months past.

NO NEW CASES.

Last One Reported Dies—Burning Garbage at South Street.

D. M. Maulu, reported as stricken with cholera on Queen street in Saturday's paper, died late Saturday night. He was about twenty years of age. Dr. Howard investigated the case but could find no evidence that the man had been near the Belgic, or handled its freight, or visited Iwilei.

Nohoanu, reported on Saturday as very low at Iwilei, was rapidly recovering at noon today, according to the report of Dr. Myers.

No new cases have been reported today.

There is no sickness on the quarantined premises at Peleula, where a man died of the sickness the other day.

The Board of Health met at 9 o'clock this morning and is in session again this afternoon. It ordered the Health Office to be kept open day and night. There is a supply of disinfectants at the office.

All mails for the country districts are to be fumigated before being dispatched.

The garbage on the South street dump is being treated with fire for purification this afternoon.

CHAMBER OF COMMERCE.

The Claudine Will Not Be Sent to San Francisco.

At the adjourned meeting of the Chamber of Commerce on the question of chartering a steamer to go to the Coast immediately, held this morning, the committee appointed on Saturday reported that the Claudine was available and could be had at an hour or two's notice at the rate of \$400 per day. The committee also reported that subscriptions in aid of the project had been promised to the extent of \$4000.

In considering the matter the Chamber came to the conclusion that nothing could be gained by sending the Claudine, as she could only report another death from cholera since the Monowai left and could take no assurance that the city was or would be free from it.

Saturday Shooting.

In the All Comers' match F. B. Damon still holds the lead with a score of 47 out of a possible 50. J. L. McLean comes second with 45 and P. H. Barnett third with 42.

In the Citizens' match Sam Johnson took first place with 24 out of a possible 25, J. Cassidy coming next with 23. Four others have made 22.

Both matches remain open for competition next Saturday.

The island steamers, being ordered to take no freight, refuse to carry disinfectants for the Government.

SAILING OF THE ALLEN.

Official Endorsement On Captain Thompson's Bill of Health.

The bark S. C. Allen got away for San Francisco shortly before two o'clock this afternoon. Her list of passengers and freight shipments will be found in another column.

The following was the endorsement on the Bill of Health furnished Captain Thompson by the Customs office:

"And I further certify that there have been six cases of cholera, five of whom have died, but that no new cases have occurred since August 24th, 1895" (Signed) "F. B. McSTOCKER" "Deputy Collector Port of Honolulu, Hawaiian Islands."

A mail was forwarded by the S. C. Allen today.

Attention is called to the adv. of the Lycurgus Lodging House and Olua Restaurant at Hilo.

Household furniture will be sold at the residence of M. D. Monsarrat, by Jas. F. Morgan at 10 o'clock on Wednesday.

Matters at the old fish market have resumed their normal aspect, and the sale of fish and meat was going on as usual today, as well as an exciting game of cards in one of the stalls at the Ewa end. The only complaint to the reporter concerning the recent visitation of the Board of Health's disinfecting officers and political prisoners was made by the old club-footed goat who occupied a stall adjacent to the one in which the card playing was going on, and he said that the lime which has been so freely sprinkled about made his feet sore.

By Jas. F. Morgan.

Auction Sale

— OF —

Household Furniture.

On Wednesday, Aug. 28th,

At 10 o'clock A. M.,

At the residence of M. D. MONSARRAT, Esq., Union Street, I will sell at Public Auction, Household Furniture, comprising BLACK WALNUT UPHOLSTERED PARLOR SET, Centre and Sofa Rugs, Large Plate Glass Mirror, a fine

Timely Topics TO

— ON THE —
"TRIBUNE"

The Tribune is a new bicycle which we are introducing to the Honolulu public. There is probably no piece of machinery, except a watch, where outside appearances can cover as vast a difference in quality as a bicycle. A wheel may be built to look all right as far as outside looks go, for a comparatively small cost, but it is difficult to judge whether a frame has one coat of enamel or four, or whether the plated parts have been run in nickel fifteen minutes or three hours. Also in the mechanical work it is not easy to tell when looking at a finished bicycle whether the cones and bearing posts are drilled, tapped and formed in one operation and used in the shape they come from the first screw machine, or whether they are first formed over size and then finished to gauge on hardened arbors at several times the cost. Of this latter class is the Tribune.

The purchaser of a Tribune may feel assured that he has got the finest bicycle in both design, quality and finish that good machinery and experience can produce.

All Tribune wheels are fitted with the Cycloidal Sprocket, patented. Any good mechanic knows that a gear wheel with teeth wrongly shaped, will not drive machinery properly and that the slightest variation from the correct form will cause friction and consequent wear. The object of the Cycloidal Sprocket is to remove this useless friction and cause the chain to drive as freely as the running of ball bearings.

The advantage of the Cycloidal Sprocket over other kinds is apparent when the rider is climbing a hill or forcing his wheel rapidly on an up grade or against a head wind, as a saving of 15 per cent in the power is guaranteed by its use.

We saw a little sawed-off individual trying to climb the Victoria street hill the other day on his wheel but he couldn't make it. He only came near enough to it to cause him to lose his temper. The fifteen per cent extra power given by the Cycloidal Sprocket would have enabled him to have ridden up that and similar hills easily.

Bicycle riders are invited to call and examine this new labor-saving invention. It will cost them nothing.

While we are on the subject of bicycles it may not be amiss to say that there are wheels within wheels, and one of them is the Gate City Stone Filter. With this filter in the house, the boiling of water is not necessary to protect the household from cholera bacilli, microbes and other wriggling things too horrible to think of and about which the learned physicians disagree and dispute.

We have a large Stock of the Gate City Filters on hand. They are reliable and cheap, and we guarantee them to eradicate all microbes and impurities of any kind.

Opposite Spreckels' Block,
807 PORT STREET.

TO WAIANAE.

SATURDAYS
— AND —
. . . . SUNDAYS.

Trains will leave Honolulu at 9:15 a.m., and 1:45 p.m. Returning will arrive in Honolulu at 3:11 p.m. and 5:55 p.m.

ROUND TRIP TICKETS:

1st Class, \$1 75
2nd Class, 1 25

F. C. Smith,

58-1f Gen'l Pass. and Ticket Agent.

THE N. B. . . .

Insect Chaser.

To save plants, flowers, trees, etc., from the destruction of insects, you will do well to communicate with the undersigned as he manufactures a Pure Vegetable Compound free of any poisonous substances; therefore, it does not kill the insects, but keeps the same off the plants, and will not injure the plants or fruits. "Roses," "Grapes," etc., will not suffer any longer but grow healthy and pretty by the use of the Compound and to convince the public of its success, I shall perform a trial order or application without charge.

H. E. Walker, Esq.

Agent "CLEVELAND BICYCLES."

DEAR SIR:—It is a pleasure to be able to add my praise to the justly renowned merits of the CLEVELAND BICYCLES. I have ridden a CLEVELAND for more than a year, and have never had occasion to find the slightest fault with its Mechanism or Stability. I heartily recommend the CLEVELAND to all persons who contemplate the purchase of a good wheel. Sincerely yours,
REUBEN A. DEXTER.
